

## Port Gigabit Ethernet Switch

Model No.: MCR 26T-D105

### Features:

MCR 26T-D105 is an unmanned layer 2 gigabit switch designed for security surveillance. It provides five 10/100/1000 Mbps auto negotiation ports that support line speed forwarding at up to 1000 Mbps. With fine steel housing, it features excellent durability and heat dissipation performance. 6 KV Lightning protection is offered to each port to effectively prevent severe lightning damage to the switch.

So, it is a right choice for small and medium sized security surveillance projects in SMBs, parks, plants, renting rooms, and so on. Choose 26T-D105 for a faster and more stable gigabit surveillance network.

A housing made of galvanized industrial-grade steel plates for excellent durability, heat dissipation performance, ensuring stable switch operation, a long service life, and more reliable outdoor security surveillance.

Integrated with professional a lightning protection circuit that offers 6KV lightning protection to each port to effectively prevent lightning-induced current from damaging the ports or switch, so as to ensure the surveillance system stability.

Support 15K jumbo Frame to speed up the transmission of large files and improve transmission efficiency.
