MCR GROUP, INC.

CATV FTTH-ORH-018P Passive Series with WDM Optical Receiver

Performance characteristics

- High quality plastic shell, two-sided through hole design, has good heat dissipation.
- Input power range +2~-10dBm.
- No power supply, no power consumption.
- Single / double port output.
- It contains WDM function to realize the integration of three networks.

Product Introduction

The ORH-018P type CATV passive optical receiver is designed for home digital TV fiber optics. It uses a high-sensitivity photodetector, operates without power or consumption. It can be economically and flexibly applied in home fiber optics. Equipped with WDM functionality, it is an ideal terminal product for achieving the convergence of telephone voice, television, and internet services.
